Our Mission

We at Misha Gerhard & Lewis offer our clients the highest value strategic consulting to enable the realization of national scale economic development in infrastructure, energy and other commodities, urban development, and next generation technology. Our international consulting practice areas leverage global strategic partnerships to augment the missions of Government national development plans and to facilitate the global market expansion of multinational private sector firms.

Our ongoing commitment to quality, confidentiality and ethics remain at the center of our work and formulates the fundamental qualifying basis for the many Public Private Partnerships that we engage to help our clients in government and the private sector coalesce around mission critical goals.

Infrastructure

Infrastructure Solutions

The Misha Gerhard & Lewis Infrastructure Practice creates infrastructure solutions to meet the demands of developing economies with ambitious national development plans. We formulate complete end-to-end solutions for roads, bridges, transportation lines and ports. From economic viability to construction and commissioning, our experts work to transform vision into reality.

By delivering high performing railways, roads, tunnels, dams and ports, we help governments establish the backbone of their national economic development plans. For national economies and developing populations we enable the creation of long lasting infrastructure that facilitates economic prosperity and the realization of quality of life to unlock the productive potential of a global citizenry. At Misha Gerhard & Lewis we preside over miraculous development by focusing national resources on developing industry infrastructure in the beginning of its development stage. Today, the companies partner with have accumulated technological skills and know-how deliver grand scale civil works and urban development solutions.

We choose top-performing and highly experienced companies as our infrastructure partners. Our partners have built thousands of kilometers of transportation networks worldwide. They apply the most strict safety regulations in building each project to realize accident free infrastructure. Our capabilities include traffic flow control, meticulous infrastructure design, projection of future urban development needs, population growth modeling, and advanced industrialization turnkey solutions. MG&L is committed to meeting the global standards in facilitating infrastructure development.

Sustaining Agricultural Industry

Misha Gerhard & Lewis consults with economies worldwide for the development of sustainable agricultural industrial growth. From supply chain logistics, to asset management and tracking to agricultural technologies that support sustainable growth to feed a growing population, we are committed to meeting the national food supply needs of our Government partners and clients.

We provide USDA quality certified agricultural products, technology and services to the world. Working together with governments, farmers, and consumers, we help clients meet their needs and solve logistics challenges in quality and availability. We are committed to supply the best products and technologies in an honest and responsible manner, building trust with partners and customers.

Agricultural Commodities

Poultry Feed

We supply the best quality animal feeds and customized nutrition solutions to farms around the world. Our poultry feeds include organic and Antibiotic Free solutions. We are committed to helping poultry resist diseases and pests and we ensure proper weight gain while reducing the number of poor performing breeds. Our partners are committed to achieving greater efficiencies in every stage of the poultry life cycle through USDA inspection. Understanding the science behind the production process, our quality assurance experts ensure our products meet your specifications to raise healthy animals.

Milk Powder

MG&L supplies skimmed, whole and fortified milks to every continent of the world. Our partners in the dairy production supply line have served customers with outstanding quality and reliability over the past seven decades. The know-how and wisdom acquired through experience allows us to ensure that quality exceeds the USDA inspection standards and the process of delivery remains simple and secure. We take pride in our airtight trading procedures that provide customers across the globe with guaranteed fresh dairy products delivered on time.

Industrial Technology

For Infrastructure

MG&L's Industrial Technology Practice brings advanced technologies to markets worldwide. We partner with a wide range of advanced industrial solutions providers with a focus on environmental sustainability, and national strategic priorities. Our fire protection product for fire in infrastructure binds to the surface and is easy to use. Our products protect against fires in buildings, fixed structures of installations, critical infrastructure, bridges, tunnels, underground facilities, vehicles, ships, boats, trains, forest fires, etc. The products extinguish even burning chemical as gasoline, ethanol etc. if these have been spread on the ground.

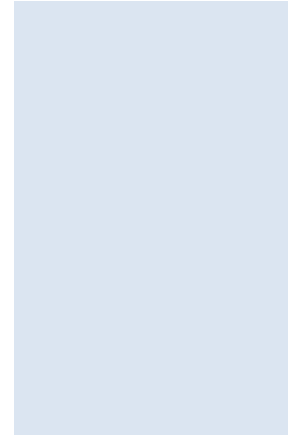

For Energy

Around the world, 240 billion pounds of plastic waste is produced every year. MG&L is bringing Polymer Waste Conversion technology to markets globally. Our state of the art industrial plant plastic waste conversion technology delivers economic and environmental benefits by converting the plastic waste into synthetic crude oil. Current forecasts predict a market for building up to 1,500 plants in USA and 6,000 plants globally. This scientifically robust technology presents the potential to generate \$15-20 billion per year. While commercially viable, it is the solution for global energy recycling and creation of the cleaner environment for our future generations.

For Food Supply

From farms to processing facilities, our food traceability solutions ensure the safest distribution of agricultural products through the use of innovative technology. This cutting-edge concept provides a solution for securing the global food supply and for ensuring protection against the outbreak of contagion due to food contamination. Equipped with software and mobile devices our technology enables components of the food supply value chain to track, measure and store data for all attributes of our food supply from grain to retail shelf product. Misha Gerhard & Lewis is committed to ensuring the highest quality of food products for the global food supply.

Energy

Strategic Partnership

MG&L is a dynamic and rapidly growing petro-chemical consulting firm with strong partnerships connecting Africa, Middle East and East Asia. We have been mainly active in the downstream Energy sector since 1971. Our East Asian partners are actively engaged in the production and distribution of high quality petroleum and petrochemical products that are refined in first-rate Crude Distillation Units. MG&L supports the open market policy for pricing Crude oil, which contributes to quality improvement and price stabilization.

We also support sustainable development to minimize the environmental impact in the process of oil drilling and refining.

Our Joint Venture Partners include a major Trade Desk in Europe with offices in Beijing, Singapore , Hong Kong, London UK , Zug Swiss , New York and other parts of the world. At present their trade volume exceeds US\$16 Billion.
